

# Experimental Histopathology

Beginning September 12, 2018, we will be switching to using *Agilent* iLab/kiosk software for managing all of our Digital Pathology service requests, equipment reservations, invoicing and billing.

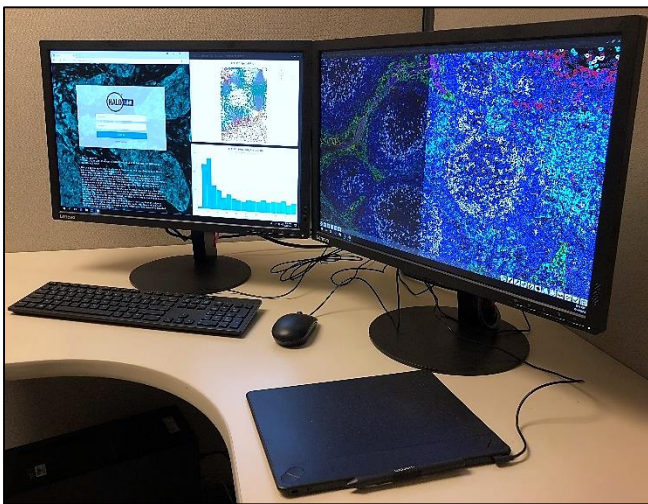

Making this transition to iLab/kiosk will allow both Exp Histo staff and our customers to track all requests, reservations, and billing information in a more centralized and searchable database. iLab also provides customers with an easy way to preview the costs of your requests prior to submission, to generate your own quotes as needed, to obtain financial approvals from your PI's, and to review and approve billing invoices!

The following digital pathology services will now be managed through iLab:

- Submitting requests for Halo and Aperio FL training
- Scheduling/reserving time on Halo workstations and Aperio FL scanner
- Managing all your financial information (funds, PO's, invoices, and billing)

Please take a few minutes to view the user help guide we've created on the EH website, as we think this will make it significantly easier for you to make the transition with us!
